

MISTY Telehealth Solution

DataSource Mobility has partnered with Parental Health to provide customers with a robust telehealth solution that addresses the needs of providers, insurers and patients. MISTY is a cost-effective software solution designed to assist patients in their care and recovery, and also provide clinicians with greater insight into their patients' recovery and compliance. These key areas of focus help reduce readmissions and healthcare expenses.

MISTY is a perfect fit for Home Healthcare, Hospitals, Long-term Care Facilities, Rehabilitation Centers and even Insurance Payers.

Software is just one part of DataSource Mobility's patient care solution. With a wide range of best-in-class technology partners, DataSource Mobility can offer customers an all in one hardware solution with MISTY software. There are a variety of configurations available to meet the needs of the patient, the facility and the insurer.

MISTY Benefits:

- Cost-effective turn-key solution tailored for your environment.
- Hardware agnostic solution to meet the customer needs.
- PC-based open architecture offers flexibility in connectivity with varying medical devices.
- Cloud hosted secure environment.
- Clinical & social component encourages patient engagement and interaction.
- Family access to patient data provides increased compliance.
- Patient has real-time access to healthcare which leads to improved patient empowerment and reduction in readmissions.
- Customizable interface based on patients' needs.
- Affordable software solution - \$50 per month.

By teaming with DataSource Mobility you will receive:

- Expertise in Healthcare Information Technology
- Pre- and Post-Deployment Technical Support
- Best-in-Class Solutions
- Lower Total Cost of Ownership
- Contracted High Volume Pricing
- World Class Customer Care!
